## **Closed Sales**

The number of sales transactions which closed during the month

**Economists' note**: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a month's sales to the amount of sales in the same month in the previous year), rather than changes from one month to the next.

Month	Closed Sales	Percent Change Year-over-Year
Year-to-Date	1,170	3.5%
May 2024	290	12.4%
April 2024	259	5.3%
March 2024	240	-12.7%

November 2023	167	-11.2%
October 2023	192	-13.5%
September 2023	195	3.7%
August 2023	201	-15.9%
July 2023	189	-25.9%
June 2023	227	-10.6%
May 2023	258	-9.8%

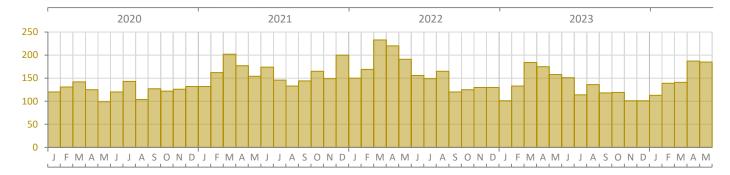

#### Cash Sales

The number of Closed Sales during the month in which buyers exclusively paid in cash

**Economists' note**: Cash Sales can be a useful indicator of the extent to which investors are participating in the market. Why? Investors are far more likely to have the funds to purchase a home available up front, whereas the typical homebuyer requires a mortgage or some other form of financing. There are, of course, many possible exceptions, so this statistic should be interpreted with care.

Month	Cash Sales	Percent Change Year-over-Year
Year-to-Date	765	1.9%
May 2024	185	17.1%
April 2024	187	6.9%
March 2024	141	-23.4%

September 2023	118	-1.7%
August 2023	136	-17.6%
July 2023	114	-23.5%
June 2023	151	-3.2%
May 2023	158	-17.3%

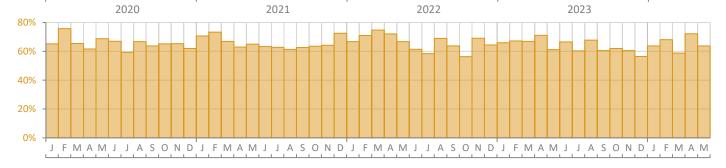

## Cash Sales as a Percentage of Closed Sales

The percentage of Closed Sales during the month which were Cash Sales

**Economists' note**: This statistic is simply another way of viewing Cash Sales. The remaining percentages of Closed Sales (i.e. those not paid fully in cash) each month involved some sort of financing, such as mortgages, owner/seller financing, assumed loans, etc.

Month	Percent of Closed Sales Paid in Cash	Percent Change Year-over-Year
Year-to-Date	65.4%	-1.7%
May 2024	63.8%	4.2%
April 2024	72.2%	1.5%
March 2024	58.8%	-12.1%
February 2024	68.1%	1.3%
January 2024	63.8%	-3.3%
December 2023	56.4%	-12.4%
November 2023	60.5%	-12.4%
October 2023	62.0%	10.1%
September 2023	60.5%	-5.2%
August 2023	67.7%	-1.9%
July 2023	60.3%	3.3%
June 2023	66.5%	8.3%
May 2023	61.2%	-8.4%

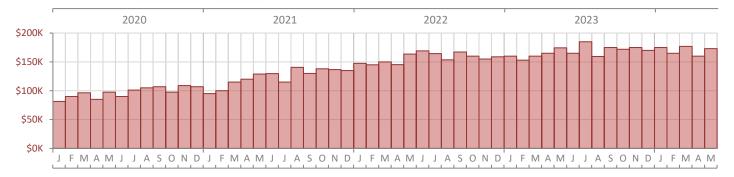

#### Median Sale Price

The median sale price reported for the month (i.e. 50% of sales were above and 50% of sales were below)

**Economists' note**: Median Sale Price is our preferred summary statistic for price activity because, unlike Average Sale Price, Median Sale Price is not sensitive to high sale prices for small numbers of homes that may not be characteristic of the market area. Keep in mind that median price trends over time are not always solely caused by changes in the general value of local real estate. Median sale price only reflects the values of the homes that *sold* each month, and the mix of the types of homes that sell can change over time.

Month	Median Sale Price	Percent Change Year-over-Year
Year-to-Date	\$168,000	3.1%
May 2024	\$173,000	-0.8%
April 2024	\$160,000	-3.0%
March 2024	\$177,000	10.6%
February 2024	\$165,000	7.8%
January 2024	\$175,000	9.4%
December 2023	\$170,000	7.0%
November 2023	\$174,950	12.9%
October 2023	\$172,000	7.5%
September 2023	\$175,000	4.6%
August 2023	\$159,250	3.7%
July 2023	\$185,000	12.5%
June 2023	\$165,000	-2.4%
May 2023	\$174,450	6.7%

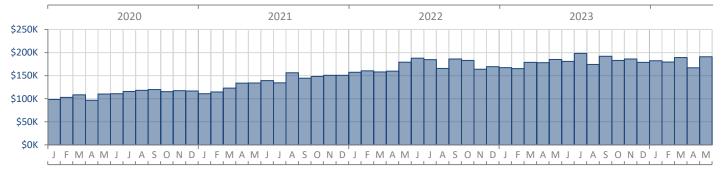

#### Average Sale Price

The average sale price reported for the month (i.e. total sales in dollars divided by the number of sales)

*Economists' note*: Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Month	Average Sale Price	Percent Change Year-over-Year
Year-to-Date	\$181,901	3.3%
May 2024	\$190,829	3.1%
April 2024	\$166,896	-6.2%
March 2024	\$189,080	5.9%
February 2024	\$179,629	8.7%
January 2024	\$182,116	8.9%
December 2023	\$178,873	5.6%
November 2023	\$185,939	13.6%
October 2023	\$182,918	0.0%
September 2023	\$191,814	3.2%
August 2023	\$174,238	5.3%
July 2023	\$198,260	7.3%
June 2023	\$180,855	-3.7%
May 2023	\$185,157	3.5%

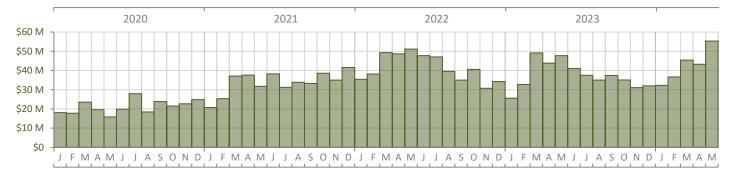

#### **Dollar Volume**

The sum of the sale prices for all sales which closed during the month

**Economists' note**: Dollar Volume is simply the sum of all sale prices in a given time period, and can quickly be calculated by multiplying Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

Month	Dollar Volume	Percent Change Year-over-Year
Year-to-Date	\$212.8 Million	6.9%
May 2024	\$55.3 Million	15.8%
April 2024	\$43.2 Million	-1.3%
March 2024	\$45.4 Million	-7.6%
February 2024	\$36.6 Million	12.0%
January 2024	\$32.2 Million	25.9%
December 2023	\$32.0 Million	-6.4%
November 2023	\$31.1 Million	0.9%
October 2023	\$35.1 Million	-13.5%

July 2023	\$37.5 Million	-20.4%
June 2023	\$41.1 Million	-13.9%
May 2023	\$47.8 Million	-6.7%

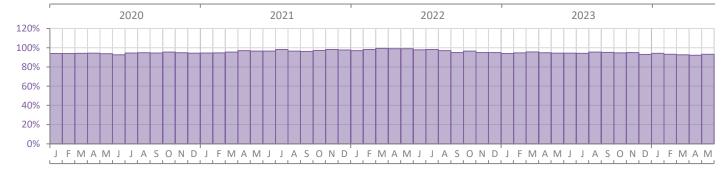

## Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the month

*Economists' note*: The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

#### Median Time to Contract

The median number of days between the listing date and contract date for all Closed Sales during the month

*Economists' note*: Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the month. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Month	Median Time to Contract	Percent Change Year-over-Year
Year-to-Date	38 Days	52.0%
May 2024	37 Days	12.1%
April 2024	36 Days	71.4%

September 2023	20 Days	11.1%
August 2023	25 Days	92.3%
July 2023	24 Days	100.0%
June 2023	29 Days	123.1%
May 2023	33 Days	230.0%

#### Median Time to Sale

The median number of days between the listing date and closing date for all Closed Sales during the month

*Economists' note*: Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

Month	Median Time to Sale	Percent Change Year-over-Year
Year-to-Date	73 Days	17.7%
May 2024	75 Days	13.6%
April 2024	67 Days	15.5%

## **New Pending Sales**

The number of listed properties that went under contract during the month

**Economists' note**: Because of the typical length of time it takes for a sale to close, economists consider Pending Sales to be a decent indicator of potential future Closed Sales. It is important to bear in mind, however, that not all Pending Sales will be closed successfully. So, the effectiveness of Pending Sales as a future indicator of Closed Sales is susceptible to changes in market conditions such as the availability of financing for homebuyers and the inventory of distressed properties for sale.

Month	New Pending Sales	Percent Change Year-over-Year
Year-to-Date	1,309	-0.8%
May 2024	226	-9.2%
April 2024	279	8.1%

September 2023	198	1.0%
August 2023	202	-21.4%
July 2023	189	-14.1%
June 2023	219	-15.4%
May 2023	249	-14.1%

## **New Listings**

The number of properties put onto the market during the month

**Economists' note**: New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

Month	New Listings	Percent Change Year-over-Year
Year-to-Date	1,680	15.7%
May 2024	295	12.2%
April 2024	319	27.6%

July 2023	198	-30.0%
June 2023	241	-19.4%
May 2023	263	-10.5%

# Inventory (Active Listings)

The number of property listings active at the end of the month

**Economists' note**: There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the month, and hold this number to compare with the same month the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

## Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

*Economists' note*: MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

Month	Months Supply	Percent Change Year-over-Year
YTD (Monthly Avg)	4.2	75.0%
May 2024	4.2	90.9%

## **Closed Sales**

The number of sales transactions which closed during the month

*Economists' note*: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a month's sales to the amount of sales in the same month in the previous year), rather than changes from one month to the next.

Month	Closed Sales	Percent Change Year-over-Year
Year-to-Date	16,590	-2.6%
May 2024	4,064	1.7%
April 2024	3,744	5.5%
March 2024	3,480	-12.9%
February 2024	3,024	-0.8%
January 2024	2,278	-6.9%
December 2023	2,773	-8.6%
November 2023	2,782	-2.0%
October 2023	3,012	-13.5%
September 2023	3,285	8.3%
August 2023	3,548	-9.1%
July 2023	3,470	-6.1%
June 2023	4,047	-7.8%
May 2023	3,996	-9.3%

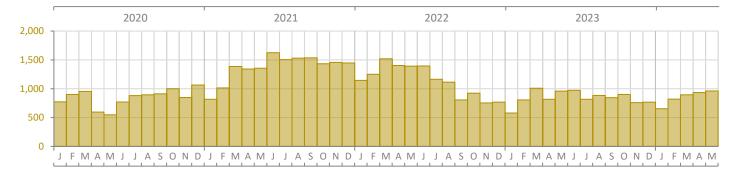

#### Cash Sales

The number of Closed Sales during the month in which buyers exclusively paid in cash

**Economists' note**: Cash Sales can be a useful indicator of the extent to which investors are participating in the market. Why? Investors are far more likely to have the funds to purchase a home available up front, whereas the typical homebuyer requires a mortgage or some other form of financing. There are, of course, many possible exceptions, so this statistic should be interpreted with care.

Month	Cash Sales	Percent Change Year-over-Year
Year-to-Date	4,262	2.2%
May 2024	961	0.2%
April 2024	934	14.3%

October 2023	901	-2.4%
September 2023	845	5.0%
August 2023	885	-20.5%
July 2023	817	-29.9%
June 2023	973	-30.2%
May 2023	959	-31.0%

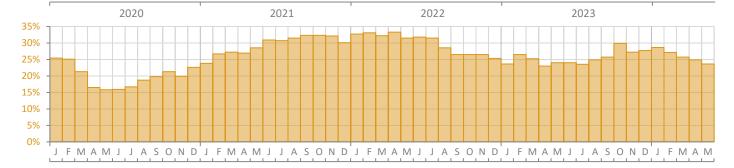

## Cash Sales as a Percentage of Closed Sales

The percentage of Closed Sales during the month which were Cash Sales

**Economists' note**: This statistic is simply another way of viewing Cash Sales. The remaining percentages of Closed Sales (i.e. those not paid fully in cash) each month involved some sort of financing, such as mortgages, owner/seller financing, assumed loans, etc.

Month	Percent of Closed Sales Paid in Cash	Percent Change Year-over-Year

## Median Sale Price

The median sale price reported for the month (i.e. 50% of sales were above and 50% of sales were below)

**Economists' note**: Median Sale Price is our preferred summary statistic for price activity because, unlike Average Sale Price, Median Sale Price is not sensitive to high sale prices for small numbers of homes that may not be characteristic of the market area. Keep in mind that median price trends over time are not always solely caused by changes in the general value of local real estate. Median sale price only reflects the values of the homes that *sold* each month, and the mix of the types of homes that sell can change over time.

Month	Median Sale Price	Percent Change Year-over-Year
Year-to-Date	\$415,000	4.4%
May 2024	\$423,710	4.2%
April 2024	\$417,800	4.5%

July 2023	\$415,000	0.0%
June 2023	\$415,000	-0.7%
May 2023	\$406,730	-1.5%

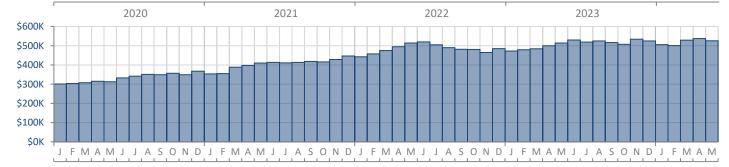

#### Average Sale Price

The average sale price reported for the month (i.e. total sales in dollars divided by the number of sales)

*Economists' note*: Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Month	Average Sale Price	Percent Change Year-over-Year
Year-to-Date	\$521,588	6.1%
May 2024	\$525,688	2.3%
April 2024	\$537,216	7.6%

October 2023	\$506,944	5.5%
September 2023	\$516,806	7.3%
August 2023	\$524,401	7.1%
July 2023	\$519,157	2.8%
June 2023	\$529,429	1.8%
May 2023	\$513,923	0.0%

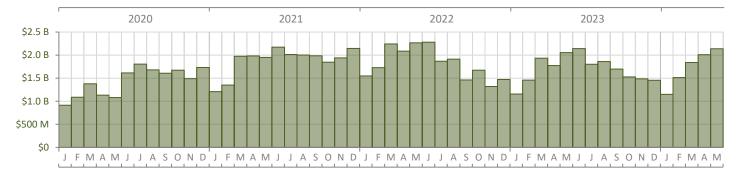

#### **Dollar Volume**

The sum of the sale prices for all sales which closed during the month

*Economists' note*: Dollar Volume is simply the sum of all sale prices in a given time period, and can quickly be calculated by multiplying Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

Month	Dollar Volume	Percent Change Year-over-Year
Year-to-Date	\$8.7 Billion	3.3%
May 2024	\$2.1 Billion	4.0%
April 2024	\$2.0 Billion	13.4%
March 2024	\$1.8 Billion	-4.9%

July 2023	\$1.8 Billion	-3.5%
June 2023	\$2.1 Billion	-6.1%
May 2023	\$2.1 Billion	-9.3%

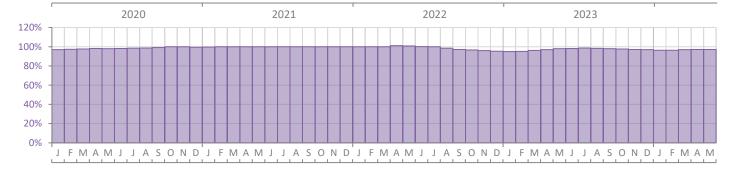

## Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the month

*Economists' note*: The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

Month	Med. Pct. of Orig. List Price Received	Percent Change Year-over-Year
Year-to-Date	96.8%	0.4%
May 2024	97.1%	-0.8%
April 2024	97.1%	0.2%

#### Median Time to Contract

The median number of days between the listing date and contract date for all Closed Sales during the month

*Economists' note*: Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the month. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Month	Median Time to Contract	Percent Change Year-over-Year
Year-to-Date	33 Days	10.0%
May 2024	28 Days	55.6%
April 2024	28 Days	3.7%

#### Median Time to Sale

The median number of days between the listing date and closing date for all Closed Sales during the month

**Economists' note**: Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

## **New Pending Sales**

The number of listed properties that went under contract during the month

**Economists' note**: Because of the typical length of time it takes for a sale to close, economists consider Pending Sales to be a decent indicator of potential future Closed Sales. It is important to bear in mind, however, that not all Pending Sales will be closed successfully. So, the effectiveness of Pending Sales as a future indicator of Closed Sales is susceptible to changes in market conditions such as the availability of financing for homebuyers and the inventory of distressed properties for sale.

## **New Listings**

The number of properties put onto the market during the month

Economists' note: New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really new listings.

Month	New Listings	Percent Change Year-over-Year
Year-to-Date	23,574	22.6%
May 2024	5,048	19.6%
April 2024	5,076	32.9%

June 2023	4,362	-31.9%
May 2023	4,222	-26.2%

## **Inventory (Active Listings)**

The number of property listings active at the end of the month

**Economists' note**: There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the month, and hold this number to compare with the same month the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

Month	Inventory	Percent Change Year-over-Year

## Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

*Economists' note*: MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

Month	Months Supply	Percent Change Year-over-Year
YTD (Monthly Avg)	2.9	61.1%
May 2024	3.2	88.2%

The number of sales transactions which closed during the month

**Economists' note:** Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a month's sales to the amount of sales in the same month in the previous year), rather than changes from one month to the next.

## **Closed Sales**

The number of sales transactions which closed during the month

**Economists' note**: Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a month's sales to the amount of sales in the same month in the previous year), rather than changes from one month to the next.

Month	Closed Sales	Percent Change Year-over-Year
Year-to-Date	6,386	-5.4%
May 2024	1,626	-6.0%
April 2024	1,417	-2.4%
March 2024	1,343	-13.1%

January 2024	868	4.5%
December 2023	1,012	-9.0%
November 2023	1,031	-1.1%
October 2023	1,250	5.1%
September 2023	1,320	23.7%
August 2023	1,381	-0.9%
July 2023	1,235	-3.1%
June 2023	1,495	-1.5%
May 2023	1,729	1.3%

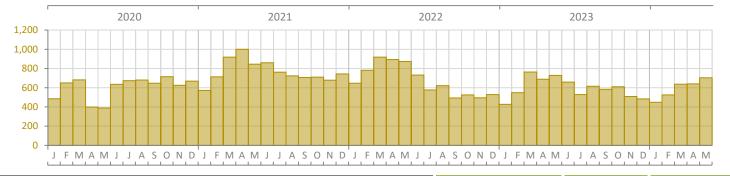

#### Cash Sales

The number of Closed Sales during the month in which buyers exclusively paid in cash

**Economists' note**: Cash Sales can be a useful indicator of the extent to which investors are participating in the market. Why? Investors are far more likely to have the funds to purchase a home available up front, whereas the typical homebuyer requires a mortgage or some other form of financing. There are, of course, many possible exceptions, so this statistic should be interpreted with care.

Month	Cash Sales	Percent Change Year-over-Year
Year-to-Date	2,954	-6.4%
May 2024	704	-3.4%
April 2024	640	-7.0%

September 2023	584	18.2%
August 2023	615	-1.0%
July 2023	528	-8.5%
June 2023	659	-10.0%
May 2023	729	-16.5%

## Cash Sales as a Percentage of Closed Sales

The percentage of Closed Sales during the month which were Cash Sales

**Economists' note**: This statistic is simply another way of viewing Cash Sales. The remaining percentages of Closed Sales (i.e. those not paid fully in cash) each month involved some sort of financing, such as mortgages, owner/seller financing, assumed loans, etc.

Month	Percent of Closed Sales Paid in Cash	Percent Change Year-over-Year
Year-to-Date	46.3%	-0.9%
May 2024	43.3%	2.6%
April 2024	45.2%	-4.6%
March 2024	47.4%	-4.0%

November 2023	49.4%	4.0%
October 2023	48.8%	10.4%
September 2023	44.2%	-4.5%
August 2023	44.5%	0.0%
July 2023	42.8%	-5.5%
June 2023	44.1%	-8.5%
May 2023	42.2%	-17.4%

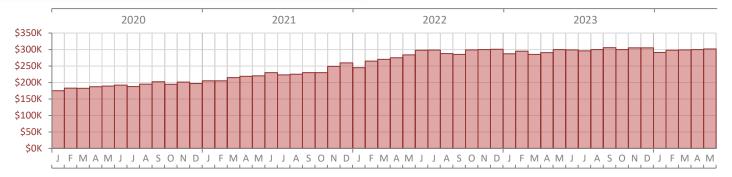

#### Median Sale Price

The median sale price reported for the month (i.e. 50% of sales were above and 50% of sales were below)

**Economists' note**: Median Sale Price is our preferred summary statistic for price activity because, unlike Average Sale Price, Median Sale Price is not sensitive to high sale prices for small numbers of homes that may not be characteristic of the market area. Keep in mind that median price trends over time are not always solely caused by changes in the general value of local real estate. Median sale price only reflects the values of the homes that *sold* each month, and the mix of the types of homes that sell can change over time.

Month	Median Sale Price	Percent Change Year-over-Year
Year-to-Date	\$299,900	2.4%
May 2024	\$301,650	0.6%
April 2024	\$299,900	3.1%

July 2023	\$296,000	-0.7%
June 2023	\$298,995	0.4%
May 2023	\$299,990	5.6%

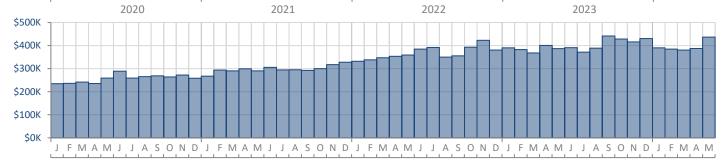

#### Average Sale Price

The average sale price reported for the month (i.e. total sales in dollars divided by the number of sales)

*Economists' note*: Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Month	Average Sale Price	Percent Change Year-over-Year

#### **Dollar Volume**

The sum of the sale prices for all sales which closed during the month

*Economists' note*: Dollar Volume is simply the sum of all sale prices in a given time period, and can quickly be calculated by multiplying Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

Month	Dollar Volume	Percent Change Year-over-Year
Year-to-Date	\$2.5 Billion	-2.1%
May 2024	\$709.5 Million	6.1%
April 2024	\$549.3 Million	-5.5%
March 2024	\$511.0 Million	-10.1%
February 2024	\$435.4 Million	-4.7%

July 2023	\$458.7 Million	-8.0%
June 2023	\$584.8 Million	0.1%
May 2023	\$668.5 Million	9.2%

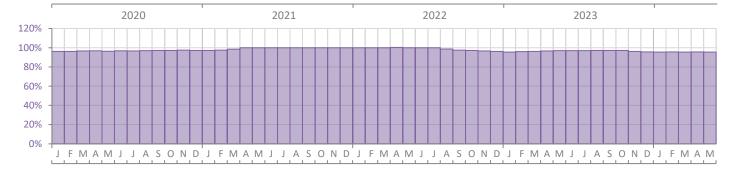

## Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the month

**Economists' note**: The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

Month	Med. Pct. of Orig. List Price Received	Percent Change Year-over-Year
Year-to-Date	95.5%	-0.9%
May 2024	95.5%	-1.5%

#### Median Time to Contract

The median number of days between the listing date and contract date for all Closed Sales during the month

*Economists' note*: Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the month. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Median Time to Contract	Percent Change Year-over-Year

	Contract 41 Days 40 Days 36 Days 39 Days 42 Days 42 Days 31 Days 24 Days 21 Days 23 Days 24 Days 24 Days 25 Days	

#### Median Time to Sale

The median number of days between the listing date and closing date for all Closed Sales during the month

**Economists' note**: Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median* Time to Sale is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

Month	Median Time to Sale	Percent Change Year-over-Year	
Year-to-Date	88 Days	31.3%	
May 2024	82 Days	30.2%	
April 2024	82 Days	26.2%	
March 2024	79 Days	23.4%	
February 2024	102 Days	37.8%	
January 2024	88 Days	27.5%	
December 2023	74 Days	15.6%	
November 2023	69 Days	16.9%	
October 2023	59 Days	0.0%	
September 2023	64 Days	23.1%	
August 2023	67 Days	34.0%	
July 2023	67 Days	48.9%	
June 2023	64 Days	48.8%	
May 2023	63 Days	53.7%	

# **New Pending Sales**

The number of listed properties that went under contract during the month

**Economists' note**: Because of the typical length of time it takes for a sale to close, economists consider Pending Sales to be a decent indicator of potential future Closed Sales. It is important to bear in mind, however, that not all Pending Sales will be closed successfully. So, the effectiveness of Pending Sales as a future indicator of Closed Sales is susceptible to changes in market conditions such as the availability of financing for homebuyers and the inventory of distressed properties for sale.

Month	New Pending Sales	Percent Change Year-over-Year
Year-to-Date	6,838	-11.5%
May 2024	1,336	-11.3%
April 2024	1,452	-12.9%

September 2023	1,227	21.0%
August 2023	1,389	0.1%
July 2023	1,383	3.2%
June 2023	1,401	3.6%
May 2023	1,507	-5.2%

## **New Listings**

The number of properties put onto the market during the month

Economists' note: New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really new listings.

Month	New Listings	Percent Change Year-over-Year	
Year-to-Date	10,255	19.5%	
May 2024	1,946	14.5%	
April 2024	2,034	16.5%

June 2023	1,745	-11.8%	
May 2023	1,699	-8.9%	

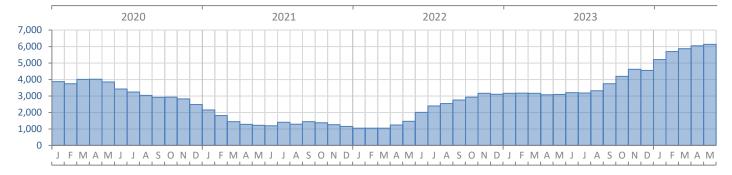

## **Inventory (Active Listings)**

The number of property listings active at the end of the month

**Economists' note**: There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the month, and hold this number to compare with the same month the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

Month	Inventory	Percent Change Year-over-Year

May 2024	6,135	98.7%
April 2024	6,048	96.6%

May 2023	3,088	111.5%

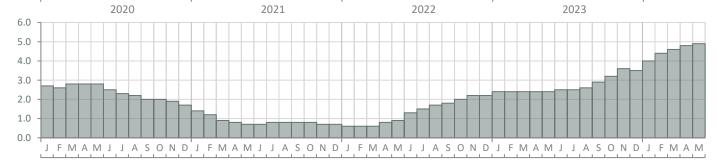

## Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

*Economists' note*: MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

Month	Months Supply	Percent Change Year-over-Year	
YTD (Monthly Avg)	4.5	87.5%	
May 2024	4.9	104.2%
